Re.: Issuance of a Title V Permit Renewal
Operating Permit No.: 26-1876-TV-01
Application No.: 025752
Multnomah County

Good Day,

The Department of Environmental Quality has completed processing Owens-Brockway Title V permit renewal application. DEQ received several comments during the public comment period. Those comments were reviewed and if appropriate, the air permit was updated. Those comments and DEQ responses are attached. The proposed air permit along with the comments and DEQ responses were sent to EPA for approval on Oct. 22, 2019. EPA did not have any comments during its 45-day review period. The public still has the right to appeal the proposed permit with EPA until Feb. 4, 2020. (i.e., 45 days EPA review period plus 60 days). The TV air quality permit for Owens-Brockway Glass Container, Inc. is being issued as proposed.

The permit became effective the date it was signed by the Regional Air Quality Manager. If you wish to appeal any of the conditions or limitations contained in the attached permit or if you have any questions, please contact George Yun in the Northwest Region office at 503-229-6093. If issues related to the permit conditions cannot be resolved to your satisfaction, you may request a hearing before the Environmental Quality Commission or its authorized representative. Any such requests shall be made in writing within 20 days of the date of this letter, and shall clearly specify which permit conditions are being challenged and why, including each alleged factual or legal objection. Permit conditions that are not contested shall be in effect upon the date the permit was signed (OAR 340-218-0220).

You are urged to carefully read the permit and take all possible steps to ensure compliance with the established conditions.

Sincerely,

Steven A. Dietrich,
DEQ Northwest Region AQ Manager

DEQ HQ Air Quality Division
EPA Region X, Tribes, Affected States
